Interson launches the SeeMore™ USB Ultrasound Imaging Probe

Pleasanton, CA– May 27, 2009—Interson announces the launch of the SeeMore USB Ultrasound Imaging probe. Inexpensive and portable, SeeMore probes plug directly into the USB port of a laptop, netbook, or desktop computer. General purpose and specialty probes are available for a wide range of clinical applications including: abdominal, OB/GYN, bladder scanning, emergency, vascular access, small parts, musculo-skeletal, nerve blocks, endocavity (prostate, transvaginal) and more, and range in frequency from 3.5 MHz to 24 MHz..

According to Roman Solek, President and C.E.O. of Interson, “Our products are so affordable and simple to use that they enable a whole new population of physicians to reap the benefits of having ultrasound in their practice. Improved patient care and productivity are the key drivers in health care today. Patients benefit, because ultrasound will now be available anywhere, anytime. Even for practices that already own an ultrasound machine, SeeMore provides a low-cost backup.”

About Interson Corporation

Interson Corporation, a privately held corporation located in Silicon Valley, is a leading U.S. manufacturer of ultrasound imaging probes. Ultrasound systems using Interson products have been installed in offices, hospitals, and clinics around the world since 1989. Interson products are designed, manufactured, and distributed in full accordance with the requirements of FDA Quality System Regulations and other U.S. and international quality system standards. Recognized as one of the top ten innovations of the year by the International Academy of Science, *SeeMore* probes extend clinicians’ vision beyond their fingertips.
